Instructions:

1. Make sure that Power is TURNED OFF at the source to the recessed housing in which you are installing the fixture.
2. If a new hole is needed (Fig.1), use a hole cutter to make hole according to the size in the table (Fig.A). A template is provide to assist with
   laying out the hold locations.
3. Connect wire to the power source (Fig.2) (Black to hot, white to neutral , green to ground) [See wiring diagram. Close the J-box securely.
4. Adjust the color temperature to the desired setting by sliding the selector switch (Fig.2A). Ensure that the switch is not between positions.
5. Select desired color temperature on remote driver box. Fig.A
6. Place remote driver box through the cut-out hole and secure driver box with screws (not included).
8. Push the spring clips on the fixture up and insert light fixture through the ceiling cut out. Ensure the spring clips are holding the
   fixture securely. (Fig. 3)
9. Restore the power at the source and the installation is completed.
