Vista™ Pendant
Installation Instructions

⚠ WARNING

PLEASE READ ALL INSTRUCTIONS BEFORE ATTEMPTING INSTALLATION

— To prevent personal injury or product damage only licensed electricians should install.
— To avoid electric shock or component damage disconnect power before attempting installation or servicing.
— This product must be installed in accordance with the National Electrical Code (NEC) and all applicable federal, state and local electrical codes and safety standards.
— Disconnect product and allow cooling prior to servicing.
— Any alteration or modification of this product is expressly forbidden as it may cause serious personal injury, death, property damage and/or product malfunction.
— To prevent product malfunction and/or electrical shock this product must be properly grounded.
— This product must be installed in accordance with the applicable installation code by a Person familiar with the construction and operation of the product and the hazards involved.

Step 1: Disconnect Power

Turn OFF power at the circuit breaker. Verify that the electrical supply is de-energized before proceeding.

Step 2: Install Mounting Bracket

Position the mounting bracket (1) over the ceiling junction box. Secure the bracket using the mounting screws (2). Ensure the bracket is properly aligned and securely fastened.

Step 3: Assemble Suspension Rods

Determine the desired fixture hanging height. Connect the required suspension rod sections (4, 5) to the lamp holder assembly (3). Route the fixture wires through the suspension rods during assembly. Tighten all threaded connections securely without twisting or damaging the wires.

Step 4: Position Ceiling Canopy

Determine the desired fixture hanging height. Connect the required suspension rod sections (4, 5) to the lamp holder assembly (3). Route the fixture wires through the suspension rods during assembly. Tighten all threaded connections securely without twisting or damaging the wires.

Step 5: Connect Electrical Wiring

Support the fixture while making electrical connections. Using the provided wire connectors (7), connect the fixture conductors to the corresponding supply conductors:

Black (Line/Hot): Connect to the supply line conductor.
White (Neutral): Connect to the supply neutral conductor.
Green/Bare (Ground): Connect to the supply grounding conductor.

Ensure all connections are secure and properly insulated.

Step 6: Secure Ceiling Canopy

Carefully position the wiring inside the junction box. Raise the ceiling canopy (6) against the ceiling and secure it using the canopy securing nuts (8). Ensure the canopy is flush against the ceiling and that no wires are pinched.

Step 7: Install Decorative Shade

Position the decorative shade (9) over the lamp holder assembly (3). Secure the shade using the retaining ring (10). Hand-tighten until the shade is firmly seated. Do not overtighten.

Step 8: Install Light Bulb

Install a compatible light bulb (11) into the lamp holder. Ensure the bulb does not exceed the fixture's maximum rated wattage

Step 7: Restore Power and Test

Restore power at the circuit breaker. Turn ON the fixture and verify proper operation.
